Webinar about:
Psoriasis & Atopic Dermatitis

Tuesday, 03. November 2026
11h45 – 13h30

Advances in the treatment of Psoriasis and Atopic Dermatitis continue to reshape clinical practice and long-term patient care.

This live webinar brings together renowned experts to discuss current evidence, practical treatment strategies, and real-world experience across both disease areas.

Topics will include long-term inflammation control, patient selection, treatment positioning, optimization of therapeutic response, and the management of challenging clinical scenarios in Psoriasis and Atopic Dermatitis.

Designed to encourage scientific exchange and practical learning, the programme combines expert insights, case-based discussions, cross-indication learnings, and audience interaction to support informed decision-making in everyday dermatology practice.

PD Dr. Dr. med. Ahmad Jalili

Dermatology & Skin Care Clinic
Buochs, NW (Switzerland)

Simone Ribero, M.D., Ph.D.

Associate Professor
at the University of Torino (Italy)

PROGRAMM

Tuesday, 03. November 2026 | 11h45–13h30

11h45 – 11h50

Welcome & Introduction

11h50 – 12h05

Long-term inflammation control – from Psoriasis to Atopic Dermatitis

- Pathophysiological links between Psoriasis and Atopic Dermatitis (AD)
- Shared inflammatory pathways (Th1/Th17 and Th2 immune responses, systemic inflammation)
- Burden of disease, comorbidities and long-term disease control

12h05 – 12h30

Optimising long-term disease control in Psoriasis

- Patient selection
- Treatment positioning
- IL-23p19 inhibition in daily clinical practice
- Real-world evidence
- Treatment response
- Dose interval optimisation

12h30 – 12h50

Optimising long-term disease control in Atopic Dermatitis

- Patient selection
- Treatment positioning
- Moderate-to-severe AD in daily clinical practice
- Long-term management strategies
- Real-world evidence

12h50 – 13h20

Interactive Case Discussion & Cross-indication Learnings

- Challenging Psoriasis and AD cases
- Difficult-to-treat patients
- Concomitant infections (e.g. tuberculosis)
- Patients with concomitant malignancies
- Real-world evidence
- Cross-indication learnings
- Interactive audience discussion & Q&A

13h20 – 13h30

Closing Remarks & Final Q&A
